

OPENVIEW TECHNOLOGY, recognizing the vital importance of safeguarding its critical operations and ensuring organizational resilience in times of crisis, implements a Business Continuity Policy in accordance with the international standard **ISO 22301:2019**

This Policy forms the foundation for the design, implementation, and continuous evolution of our company's Management System. Concurrently, it serves as the core framework ensuring the safe, seamless, and uninterrupted delivery of all our corporate services.

Our Business Continuity Policy is firmly committed to the following strategic pillars:

- ***Regulatory & Statutory Compliance***

Full alignment with local, national, and international regulations, as well as relevant legislation, establishing compliance as our minimum baseline commitment

- ***Continuous Monitoring & Improvement***

Ongoing enhancement of our business continuity performance through systematic monitoring and evaluation of the effectiveness of our programs and initiatives at all levels.

- ***Risk Assessment & Management***

Proactive risk assessment across all office operations and project executions, ensuring the immediate implementation of all necessary preventative and corrective measures.

- **Fostering a Corporate Culture**

Instilling a strong business continuity mindset among all our employees, while actively encouraging our suppliers, clients, and partners to adopt similar best practices.
